Competitor Landscape and Pricing: Earbuds, Smartwatches & Charging Accessories on Amazon India (2024–2026)

1 Executive Summary

India's budget wearables and accessories market is undergoing a structural shakeout, with volume-driven growth giving way to premiumization and quality-led competition. boAt remains the dominant earbuds brand but its TWS share eroded from 39.4% in 2023 to 27.2% in Q1 2025, challenged by Boult Audio (17.0%) and Noise (9.7%), while Chinese ecosystem players OnePlus (6.2%) and Realme (5.1%) are the fastest-growing entrants, leveraging smartphone integration and aggressive pricing in the ₹1,500–₹2,000 band [1]. In smartwatches, Fire-Boltt's collapse—from 30% share in 2023 to 9.7% in 2025—handed leadership to Noise (26.6%), as overall shipments fell from 53.4 million to 28.9 million units amid widespread consumer dissatisfaction with sensor accuracy and white-label rebadging [2, 3, 4]. In charging accessories, Portronics and Ambrane compete as value specialists (₹149–₹2,499 selling prices), while OnePlus is investing ₹6,000 crore to manufacture IoT devices locally [5].

Three findings stand out. First, aggressive MRP-inflation discounting—Fire-Boltt averages 79.5% off listed MRP versus JBL's 46.8%—masks razor-thin actual price differences and signals a race-to-bottom dynamic that is eroding category trust [6]. Second, every major Indian brand is pivoting away from pure domestic volume: boAt is pursuing a delayed ₹1,500 crore IPO and expanding to the UAE and Singapore; Noise is leveraging $30 million from Bose to push premium "Sound by Bose" products into UK and EU retail; and Fire-Boltt is diversifying into smartphones and smart eyewear to offset its wearables decline [7, 8, 9, 10]. Third, quality complaints—particularly poor after-sales service (Portronics rated 1.6/5 on Trustpilot) and inaccurate health sensors—are the primary demand suppressant, yet the premium segment above ₹15,000 surged 147% in 2024, confirming that consumers will pay more for reliable products [11, 12, 13]. Any new entrant or investor should prioritize product quality and after-sales infrastructure over price aggression, as the market's value pool is migrating decisively upward.

2 Market Context and Overall Trends

India's wearable device market peaked at 134.2 million units in 2023 before entering a structural correction —shipments declined 11.3% in 2024 to 119 million units [14] and fell a further ~4% in 2025 to approximately 114.2 million units [15]. This marked the first-ever annual decline for the category. In value terms, the smart wearable market stood at roughly USD 2.8–2.9 billion in 2025, with projections of USD 3.6 billion in 2026 and approximately USD 10 billion by 2031 at a ~23% CAGR [16].

Diverging category trajectories define the current landscape. The TWS earbuds segment surpassed $1.3 billion in 2024, growing 14% YoY [17], before flattening to ~1% growth in 2025 [18]. Smartwatches, by contrast, experienced a severe correction —shipments tumbled roughly 30–34% in 2024 [2, 14] and declined a further ~18% in 2025 [3]. The mobile accessories market (chargers, cases, earphones) grew from USD 6.86 billion in 2025 to an estimated USD 7.45 billion in 2026, expanding at an 8.5% CAGR [19], with wireless charging growing at approximately 27.5% CAGR [20].

Premiumization is reshaping the competitive landscape. The premium smartwatch segment (above ₹15,000) surged 147% YoY in 2024 even as the overall market contracted [11]. Average selling prices for wearables rose from $20.60 to $21.70 in Q2 2025 —the first uptick after years of decline [21]. In TWS, ANC-enabled devices grew 24% YoY in 2025 and spatial audio capabilities expanded 67% YoY [18]. Meanwhile, Chinese brands (Realme, OnePlus, Xiaomi) captured 16% of the TWS market in 2024, growing 33% YoY [22], leveraging smartphone ecosystems and aggressive budget pricing in the ₹1,500–₹2,000 band that grew 52% YoY [22].

Offline channels are also resurging —offline wearable shipments grew 7.2% in 2024 (share rising to 37.8% from 31.3%), while online declined 19.7% [14], signaling a shift toward physical retail especially in tier II/III cities.

3 Market Share Landscape

3.1 TWS Earbuds

boAt remains India's dominant TWS brand but its grip is loosening. Its volume share fell from 39.4% in 2023 to 32.9% in 2024 (with shipments declining 4% YoY) [1, 22], and further to 27.2% in Q1 2025 [1]. Boult Audio has emerged as the strongest challenger, surging to 12.9% share in 2024 (+52% YoY) and 17.0% in Q1 2025 (+46% YoY) [1]. Noise held third position at 9.7% in 2024, growing 37% YoY [1]. Chinese ecosystem brands OnePlus (6.2%) and Realme (5.1%) rounded out the top five, with Realme posting the fastest growth at 55% YoY [1]. Both posted their highest-ever annual TWS volumes in 2025, growing 21% and 22% YoY respectively [18]. Global brands —JBL, CMF, and Apple combined —captured only ~6% of the market in 2024, a record low [1].

Chart Explanation: boAt leads with 32.9% share [1], followed by Boult Audio at 12.9% and Noise at 9.7% [1]. OnePlus

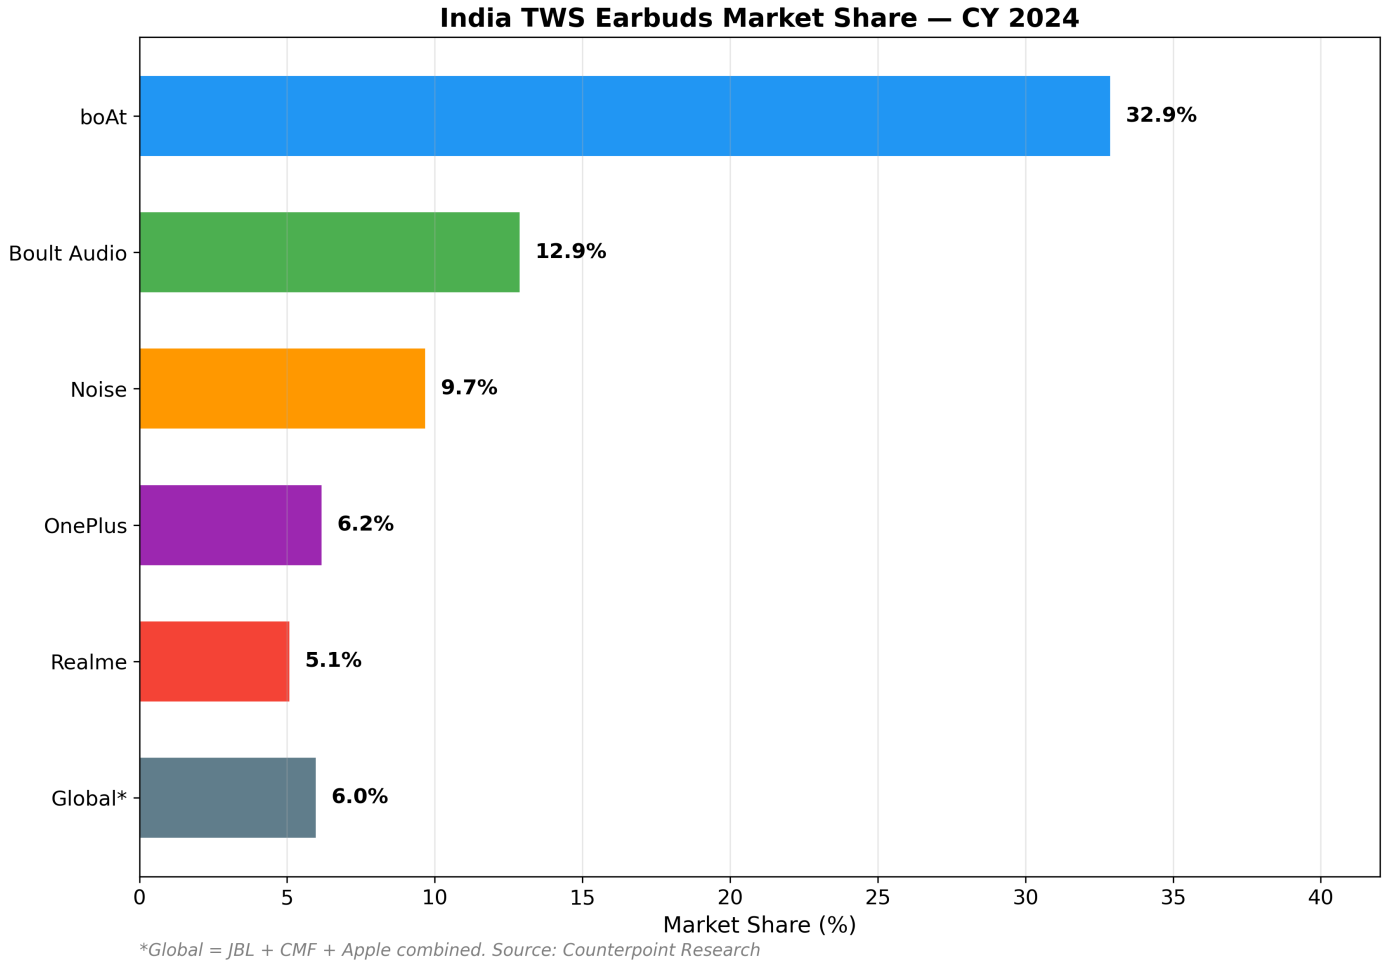

Figure 1: India TWS Earbuds Market Share —CY 2024

(6.2%) and Realme (5.1%) represent the growing Chinese brand cohort [1], while global brands (JBL, CMF, Apple) collectively hold just ~6% —their lowest share ever [1].

3.2 Smartwatches

The smartwatch segment has undergone a dramatic reshuffling. Fire-Boltt, which led with 30% share in 2023, saw its position collapse —falling to 19% in 2024 and just 9.7% in 2025 [2, 3]. Its shipments crashed 54% in 2024 [2], declining from approximately 13 million units in 2023 to fewer than 3 million in 2025 [4]. Noise seized market leadership in Q2 2024 with 29% share [23] and held it through 2024 (27%) and 2025 (26.6%) [2, 3]. boAt slipped from 17% in 2023 to 13% in 2024 before recovering slightly to 14.1% in 2025 [2, 3]. Titan/Fastrack was the only major brand to grow, posting 35% YoY growth in 2024 [2]. Overall smartwatch shipments tumbled 30% in 2024 [2] and a further ~18% in 2025 to 28.9 million units [3].

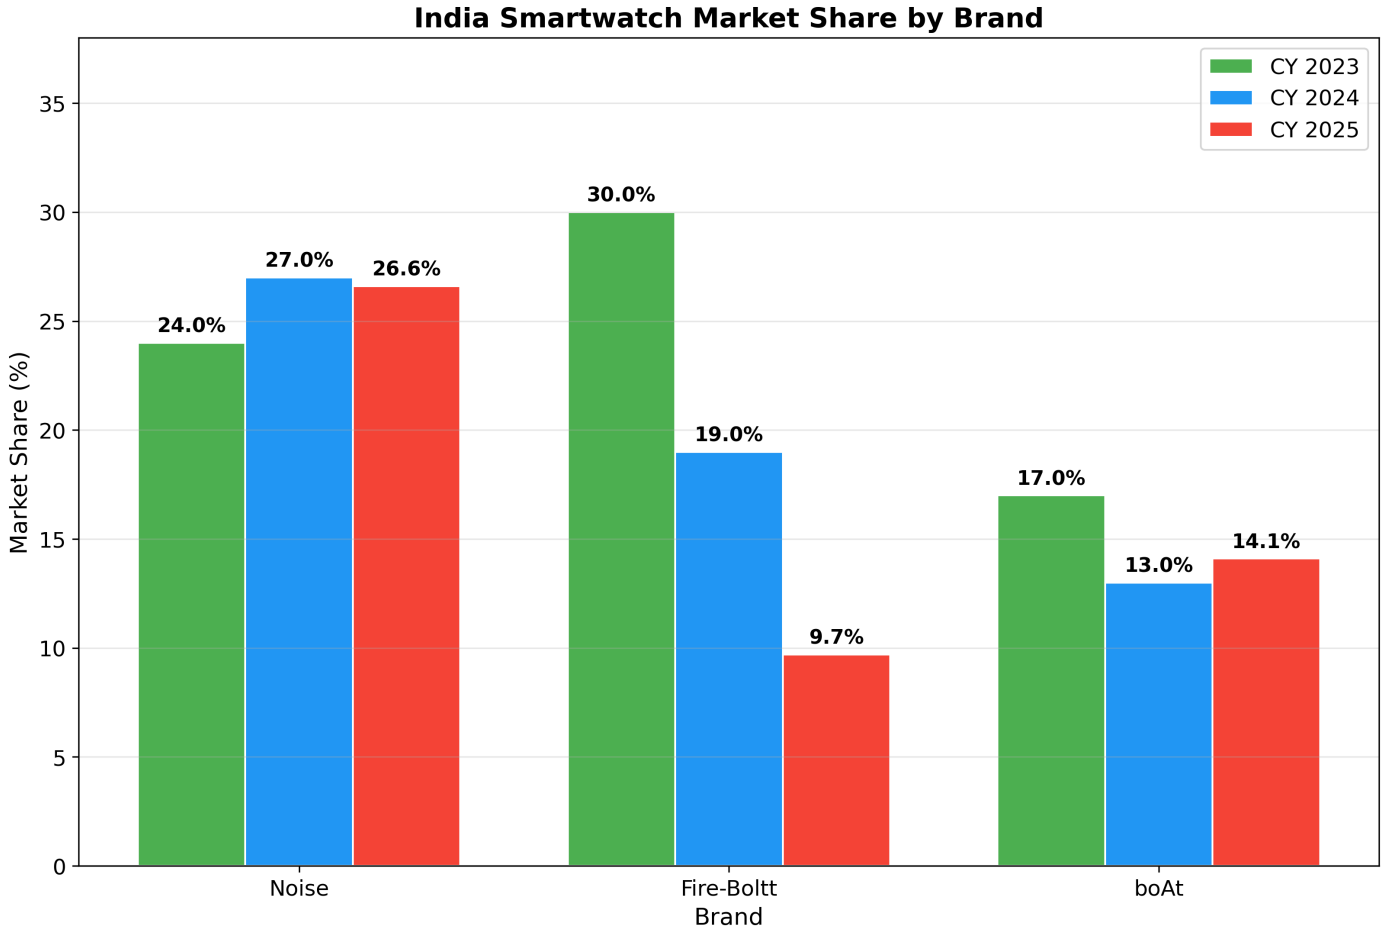

Figure 2: India Smartwatch Market Share by Brand

Chart Explanation: The chart illustrates Fire-Boltt's dramatic decline from 30% (2023) to 9.7% (2025) [2, 3, 4], while Noise maintained stable leadership at 26–27%. boAt held steady around 13–14% across the period. Overall smartwatch shipments fell 30% in 2024 [2] and ~18% in 2025 [3].

4 Brand Profiles: Price Bands and Positioning

Analysis of 183 product listings across seven target brands on Amazon India reveals sharply different pricing strategies and portfolio approaches [6].

4.1 Price Bands by Brand and Category

Brand	Category	Discounted Price	MRP Range	Avg Rating	Avg Discount %
boAt	Earbuds	₹349–₹1,799	₹999–₹5,999	4.05	61.0%
boAt	Smartwatches	₹1,499–₹2,999	₹6,990–₹7,990	3.96	72.8%
boAt	Charging	₹177–₹849	₹499–₹1,749	4.19	58.2%
Noise	Smartwatches	₹249–₹4,499	₹999–₹7,999	4.02	57.8%
Noise	Earbuds	₹1,299–₹1,799	₹2,999–₹3,999	3.87	58.3%
Fire-Boltt	Smartwatches	₹1,499–₹3,999	₹7,999–₹19,999	4.23	79.5%
JBL	Earbuds	₹499–₹1,499	₹999–₹2,999	4.00	46.8%
OnePlus	Charging	₹199–₹449	₹599–₹1,099	4.14	63.6%
Portronics	Charging	₹154–₹529	₹339–₹1,499	4.17	58.9%
Ambrane	Charging	₹149–₹2,499	₹299–₹2,999	4.03	44.8%

Table 1: Amazon India Price Bands and Ratings by Brand and Category [6]

Portfolio breadth varies significantly. boAt is the only brand competing across all three categories (65 products), making it the most diversified player [6]. Fire-Boltt and Ambrane are single-category specialists —Fire-Boltt focuses exclusively on smartwatches (26 products) while Ambrane concentrates on charging accessories (28 products) [6]. Noise primarily competes in smartwatches (22 products) with a small earbuds presence, while OnePlus focuses on charging accessories (11 products) with a single smartwatch listing [6].

4.2 Discount and Pricing Strategy

Fire-Boltt employs the most aggressive high-anchor discounting at 79.5% off MRP on average, with discounts reaching up to 91% —its listed MRPs (₹7,999–₹19,999) are set far above actual selling prices (₹1,499–₹3,999) to create a perception of extreme value [6]. boAt uses variable discounting across categories: 58.2% on charging, 61.0% on earbuds, and 72.8% on smartwatches [6]. JBL and Ambrane adopt the most conservative discounting (46.8% and 44.8% respectively), indicating more realistic MRP-to-selling-price ratios and stronger brand premium positioning [6].

Chart Explanation: Fire-Boltt leads with 79.5% average discount off MRP [6], employing a high-anchor pricing strategy where listed MRPs (₹7,999–₹19,999) far exceed selling prices (₹1,499–₹3,999) [6]. JBL and Ambrane maintain the most conservative discounting at 46.8% and 44.8%, reflecting more realistic pricing [6].

Positioning claims differ by segment. boAt positions as "India's #1 audio and wearables brand" with mass-market appeal across price points. Noise emphasizes health-tech and premium design, recently bolstered by its Bose partnership. Fire-Boltt targets value-conscious buyers with feature-rich smartwatches at aggressive price points. JBL leverages its global audio heritage for premium positioning, while Portronics and Ambrane compete as value-oriented charging accessories specialists [24, 25, 26, 27].

5 Strategic Moves: boAt, Noise, and Fire-Boltt

5.1 boAt: IPO Pursuit and Profitability Turnaround

boAt's parent Imagine Marketing filed its DRHP via the confidential pre-filing route in April 2025 [28], receiving SEBI approval in September 2025 [7]. However, the IPO was subsequently reduced from ₹2,000 crore to ₹1,500 crore (fresh issue cut from ₹900 crore to ₹500 crore) in October 2025 [29], and deferred again in January 2026 amid auditor scrutiny over financial mismatches [30]. The company has raised approximately $236 million in total funding [31].

Financially, boAt returned to profitability in FY25 with ₹60 crore net profit on revenue of ₹3,098 crore [32], and FY26 PAT grew 38% to ₹84.5 crore with ₹397 crore in cash reserves and zero bank debt [33]. A major leadership overhaul in September 2025 saw professional CEO Gaurav Nayyar (ex-Bain partner) replace co-founder Sameer Mehta, while co-founder Aman Gupta moved to a non-executive role and subsequently launched OffBeat Studios, raising ₹100 crore in seed funding [34, 35]. Internationally, boAt entered the UAE (July 2025), expanded into Lulu Hypermarkets (February 2026), and entered Singapore via Binny Bansal-backed Opptra (May 2026) [36, 37], targeting SAARC, GCC, and Southeast Asia within 3–4 years [38]. However, a 34% employee attrition rate in FY25 raised concerns ahead of the IPO [39].

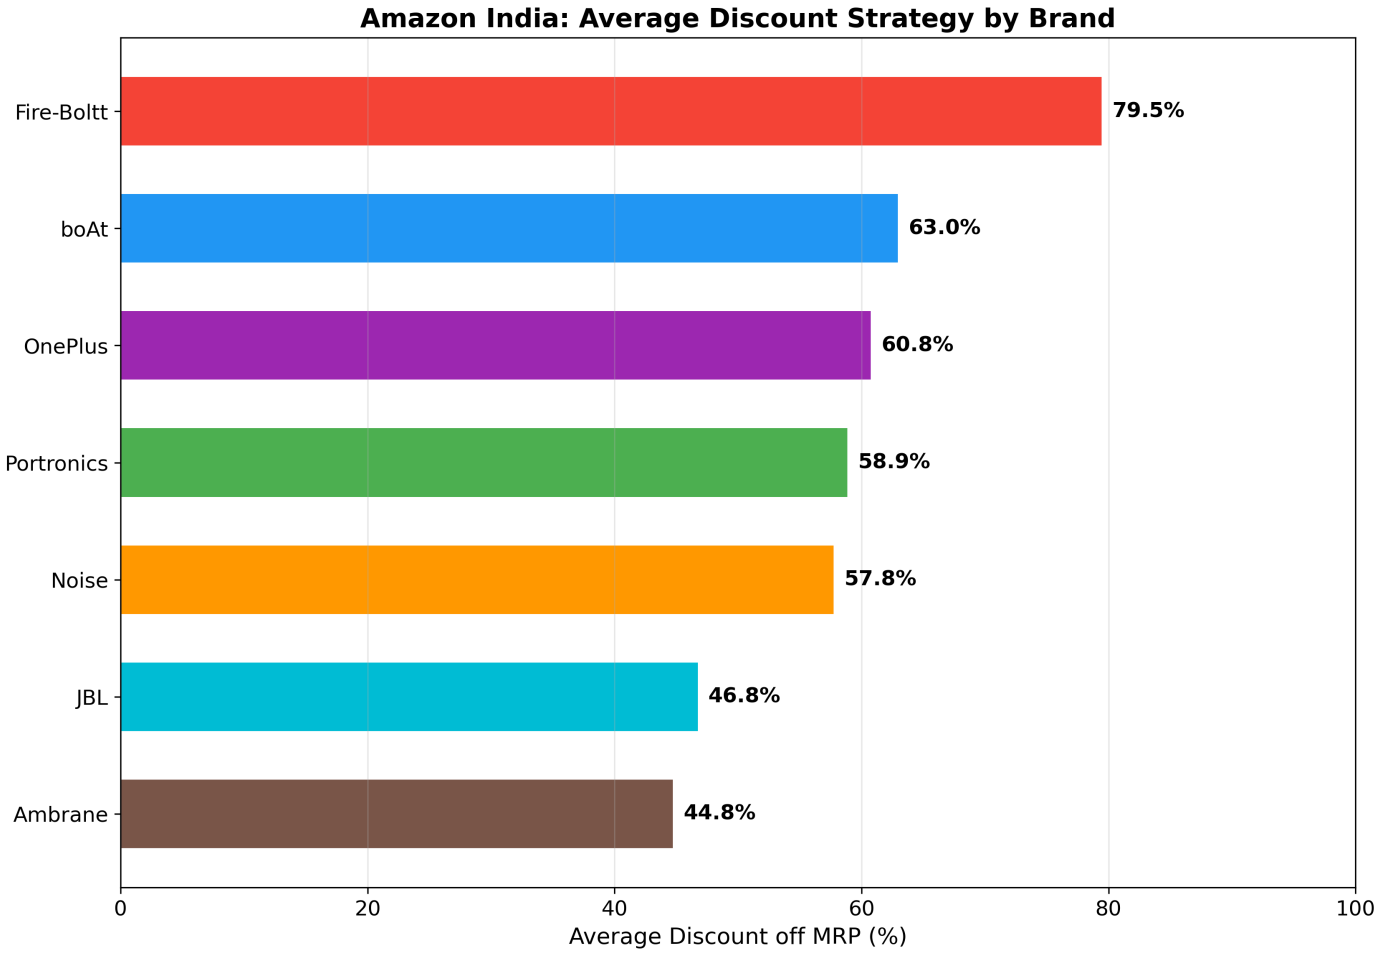

Figure 3: Amazon India Average Discount Strategy by Brand

5.2 Noise: Bose-Backed Premiumization

Noise raised a total of $30 million from Bose Corporation across two rounds —$10 million in Series A (December 2023, ~$420 million valuation) and $20 million via convertible debentures in April 2025 (~$470 million valuation) [8], though an internal valuation report pegged the company closer to $300 million [40]. Revenue declined 24% to ₹1,048 crore in FY25 [41], reflecting the broader smartwatch downturn.

The Bose partnership has driven a premium product push: Master Buds (February 2025, ₹7,999) [42], Master Buds 2 (CES 2026) [43], and Master Buds Open (IFA Berlin 2026) [44] all feature "Sound by Bose" technology. Noise also launched the REP Band —India's first screenless fitness wearable at ₹9,999 [45] —and entered home audio with the Homestage soundbar range [46]. Internationally, Noise expanded to the UAE via Virgin Megastores and entered the UK (Selfridges) and EU (Printemps, Paris) in March 2025 [47]. Co-founders Gaurav and Amit Khatri continue to lead the company [48].

5.3 Fire-Boltt: Diversification Under Pressure

Fire-Boltt has remained largely bootstrapped with only $1 million in angel funding from 2017 [31], and its smartwatch share dropped from ~30% to 19% in 2024, falling to second place behind Noise's 27% market leadership [11]. Rather than doubling down on wearables, the company pivoted aggressively: launching FireLens AI-powered smart eyewear in September 2025 at ₹11,999 [9], and entering the smartphone market under the "Boltt" brand in June 2026 with over $50 million invested, targeting the ₹12,000–17,000 segment in partnership with Flipkart [10, 49]. Founder Arnav Kishore continues to lead the company with no IPO plans disclosed.

6 Strategic Moves: OnePlus, JBL, Portronics, and Ambrane

6.1 OnePlus: Local Manufacturing and IoT Ecosystem

OnePlus has aggressively scaled its earbuds portfolio spanning ₹1,799 to ₹13,999, with launches including Nord Buds 3 at ₹2,299 [50], Buds Pro 3 at ₹13,999 [51], Nord Buds 4 Pro at ₹3,999 [52], and Nord Buds 4 at ₹3,299 featuring 52dB ANC and Bluetooth 6.1 [53]. Its smartwatch line targets the premium tier —Watch 2 at ₹24,999 with Wear OS 4 [54], Watch 2R at ₹17,999 [55], and Watch 3 at ₹24,999 with Wear OS 5 [56]. The most significant strategic move was the June 2025 partnership with Optiemus Electronics under "Project Starlight" —a ₹6,000 crore investment over three years to manufacture IoT devices (starting with earbuds) locally in India [5]. OnePlus held 6.2% TWS market share in 2024 [1].

6.2 JBL: Premium Positioning Under Pressure

JBL has refreshed its premium lineup with the Live Beam 3 at ₹24,999 (June 2024) [57], Tune Series 2 at ₹9,499–₹11,999 with Adaptive Noise Cancelling (April 2025) [58], and Live 4 series at ₹24,999 with Hi-Res Audio (August 2026) [59]. The Tune Series 2 was positioned as "redefining personal audio" with first-time features including Bluetooth 5.3 LE Audio and IP54 resistance [27], and the Tour Pro 3 won the Gadgets Now Award 2025 for best TWS [60]. Despite product quality, JBL's market share has eroded —global brands including JBL, CMF, and Apple captured their lowest-ever combined share of just 6% in India's TWS market in 2024 [1], losing ground to both Indian and Chinese budget brands.

6.3 Portronics: Bootstrapped Charging Specialist

Portronics has expanded aggressively into GaN chargers and wireless charging, growing its workforce from ~273 to ~335 employees between December 2024 and September 2026 [61]. Key launches include the Adapto 100 (100W GaN) at ₹3,999 [62], Ignis 65 power bank with 65W PD [63], and the Moji 10 magnetic wireless power bank at ₹1,549 [64]. The brand has also diversified into lifestyle products with the Movo 3-in-1 charger/mirror/speaker [65] and gaming accessories [66].

6.4 Ambrane: Solid-State Battery Pioneer

Ambrane targets ₹500 crore revenue by FY2025-26, up from ₹230 crore in FY2022-23 [67]. The company announced global expansion into UAE, Europe, USA, and East Asia with a ₹100 crore international revenue target [68]. Its most distinctive strategic bet is pioneering solid-state battery power banks in India, with plans to scale production to 2 million units annually within 2–3 years [26]. Key product launches include the AeroSync Quad 4-in-1 wireless charger [69] and MagSurge Qi2 wireless power bank [70].

7 Quality Complaints and Consumer Sentiment

The Indian smartwatch market's dramatic decline —from 53.4 million units in 2023 to 28.9 million in 2025, with revenue collapsing 43.9% from $1.39 billion to $780 million [4] —has been driven primarily by poor product quality and lack of innovation. Counterpoint Research attributed the 30% YoY decline in 2024 to "limited innovation in lower-price segments, poor sensor accuracy, unclear product portfolio, and dissatisfaction with initial purchases" [13]. IDC reported that cheap Chinese white-label copies are "diluting the first-time user experience" with abnormally wrong health indicators, eroding trust in the entire segment [71].

Brand-specific quality issues are well-documented. boAt's CEO Sameer Mehta acknowledged that "sub-par experience" from non-branded products has led consumers to become wary of the segment [71], while Livemint reported that companies including boAt "rebadge white-label products with no real upgrades, leaving customers disinterested" [4]. boAt's smartwatch shipments declined 47% in 2024 [2], with sales falling from 7.5 million units in 2023 to 4.1 million in 2025 [4]. Fire-Boltt suffered the steepest decline —shipments crashed 54% in 2024 [2] and a further 52.2% in 2025 [72], with NDTV Gadgets noting issues with "tracking accuracy" and "clunky" UI and software [73]. Noise's co-founder Amit Khatri acknowledged the market is undergoing recalibration, with "quality-conscious consumers" emerging after years of "unprecedented price points" that spurred unsustainable demand [4].

After-sales service is a particular pain point for accessories brands. Portronics is rated 1.6 out of 5 on Trustpilot, with complaints about products failing within warranty periods, delayed replacement pickups, and customer service described as sending "AI emails" that don't address issues [12]. Portronics chargers carry only a 6-month warranty (vs. 12 months for power banks), suggesting the company itself anticipates shorter product lifespans [62]. Ambrane's return policy requires handover and unboxing videos for verification, offering only exchanges or gift cards rather than direct refunds [74].

Paradoxically, Amazon ratings tell a more nuanced story. Fire-Boltt leads with the highest average rating of 4.23 across 26 smartwatch listings, with no product rated below 4.0 [6]. boAt dominates in review volume with over 4.38 million total reviews across 65 products [6]. The lowest-rated products include Noise ColorFit Pro 4 Alpha at 3.5 [6] and JBL Tune 215BT at 3.7 despite 87,798 reviews [6]. Titan's CEO summarized the structural issue: "Smartwatches have gone through a big correction…a lot of corrections in terms of oversupply, undercutting of price…that phase is over now" [4]. The premium segment (above ₹20,000) surging 147% YoY in 2024 confirms consumers are willing to pay more for quality [2].

8 Competitive Outlook and Emerging Threats

Chinese brand incursion represents the most significant competitive threat to Indian incumbents. Chinese brands captured 16% of India's TWS market in 2024, growing 33% YoY [22], with Realme and OnePlus posting their highest-ever annual TWS volumes in 2025 (growing 22% and 21% YoY respectively) [18]. These brands leverage smartphone ecosystem integration, omnichannel distribution, and aggressive pricing in the ₹1,500–₹2,000 band —which grew 52% YoY in 2024 [22] —to erode Indian brands' dominance. In overall wearables, Oppo+OnePlus held 8% share and Realme 6.5% in H1 2025 [75].

Premiumization is accelerating. The premium smartwatch segment (above ₹15,000) surged 147% YoY in 2024, led by Apple, Samsung, and OnePlus [11]. Overall wearable ASPs rose from $20.60 to $21.70 in Q2 2025 —the first uptick after years of decline [21]. In TWS, ANC-enabled devices grew 24% YoY and spatial audio capabilities expanded 67% YoY in 2025 [18]. Indian brands are responding: boAt is pushing into soundbars, GPS watches, and smart rings above ₹5,000; GoBoult launched a premium Clarity series priced 1.3–1.5x above its average order value [21].

Emerging form factors are reshaping the competitive frontier. Open-wear stereo (OWS) earbuds have seen shipments nearly quadruple in 2025, with over 20 brands now offering models [18]. Smart rings and smart glasses are expected to see high double-digit growth, with IDC noting convergence of advanced sensing and AI applications as the next innovation frontier [14]. AI integration is becoming a key differentiator —OnePlus offers AI noise cancellation and live translation below ₹2,500 [18].

Channel and geographic diversification are critical strategic responses. Offline wearable shipments grew 7.2% in 2024 (share rising to 37.8% from 31.3%), while online declined 19.7% [14], signaling a shift toward physical retail in tier II/III cities. Simultaneously, Indian brands are pursuing international expansion —boAt to UAE and Singapore, Noise to UK and EU, Ambrane targeting UAE, Europe, and USA —as a growth cushion against domestic market saturation [21]. Counterpoint projects low single-digit TWS growth for 2026 [18], while the overall smart wearable market is expected to reach approximately USD 3.6 billion in 2026 and USD 10 billion by 2031 at ~23% CAGR [16].
